

Heller Center – Resource Implications and Funding Agreements

Research Incentive Distribution. The Center shall participate in the distribution of indirect cost incentives in the following manner:

The portion of the indirect costs (40%) normally allocated to Colleges shall be shared with the Center in the following manner: (i) When a grant or contract application is submitted by a Professional Research Assistant, or Research Professor whose primary appointment is in the Center, then the full 40% of indirect costs normally allocated to Colleges shall accrue to the Center, unless on-campus space normally assigned to a Department and College is used for the project. In this case, 25% of the indirect cost shall be allocated to the Center and 15% to the appropriate College. (ii) When a grant is submitted by a faculty member whose primary appointment is in a School or College, and the Center provides primary support for grant development and provides administrative support for the funded project, one half (50%) of the indirect costs normally allocated to Colleges (20%) shall accrue to the Center and the other half (20%) to the faculty member's College. (iii) When a grant is submitted by a faculty member whose primary appointment is in a School or College, and the Center provides significant support in developing and obtaining the grant, but the grant is supported administratively by the School or College, then the Center and College shall negotiate sharing the indirect cost incentives prior to grant submission. In all cases, the faculty member serving as Principal Investigator on a grant shall have the authority to determine whether the College or the Center will provide administrative services to the project.
